

# VISA MASTER

---

A privacy-first AI workspace for travelers who prepare their own visa applications.

Deer Ma & Dayuan Tan · July 2026  
dayuan1@umbc.edu

## PROBLEM

# The Problem

### USE AN AGENCY

# \$500

Quoted for a single family application

The work goes away, but so does control:  
passport, financial, and employment documents  
are handed to a third party.

### DO IT YOURSELF

# Many hours

Across several days, in our own family's case

Fragmented rules, unfamiliar forms, evidence to  
assemble, files scattered across devices, no  
structure for a group.

**Today the applicant chooses between cost and hours — and neither path leaves them in control of their own documents.**

# The Product

---

Visa Master turns verified visa requirements into a guided workspace on the applicant's own machine — one they can actually execute.

---

## Sourced

Requirements gathered from official consulate and visa-center sites, shown as a short checklist — each item with its source link and last-checked date.

---

## Local

Passport, financial, employment, and family answers are completed and stored locally, not sent to a general-purpose AI system.

---

## Executable

Official forms pre-downloaded, templates for the gaps, progress tracked per applicant, and an organized package at the end.

First customer: Chinese ordinary-passport holders preparing Schengen and U.S. B1/B2 short-stay visas independently. \$29 per application workspace.

## DIFFERENTIATION

# Why We Win

Three alternatives exist today. Each leaves the same gap open.

---

---

### vs. agencies

\$29 instead of a \$500 quote, and the passport, bank statements, and employment letters never leave the applicant's device.

---

### vs. AI chatbots

A workspace that executes — forms, files, progress, and a submission-ready package — instead of a long answer the applicant still has to act on.

---

### vs. Atlys, iVisa

A local-first DIY workflow rather than a cloud service model, built specifically for the Chinese applicant experience.

**Every requirement links to an official source and shows when it was last checked. No approval is promised, and none is implied.**

# Market Opportunity

The serviceable market is defined by visa-preparation events, not by the tourism economy as a whole.

|                                                                                                           |                                                                                                                             |                                                                                            |                                                                                                                  |

TAM \$1.60B

Travel lifecycle · 55.21M visits × \$29

SAM \$73.8M

Visa preparation · 2.55M service events × \$29

SOM \$870K

24-month target · 30,000 paid workspaces

# Business Model

\$29

Introductory price per application workspace, rising to \$39–69 by route complexity.

6 MONTHS

\$29K

1,000 workspaces · 70% margin

12 MONTHS

\$392K

8,000 workspaces · 76% margin

24 MONTHS

\$1.77M

30,000 workspaces · 80% margin

Individual application workspace

MVP launch

Family / group pack

After core workflow validation

Expert review add-on

Pilot with partner agencies

B2B workflow licensing

After repeatable B2C workflow

Travel-platform monetization

Long-term · excluded from the forecast

Illustrative base case. All projections are management assumptions; the first six months are treated as a founder-funded validation period.

TEAM

# Team & Milestones

## Deer Ma

CEO · PRODUCT

Recent Johns Hopkins graduate; previously A&R at a leading Chinese record label. Owns customer discovery, product design, travel-agency partnerships, and go-to-market.

## Dayuan Tan

CTO · ENGINEERING

Computer Science Ph.D. candidate at UMBC with industry experience at Ciena; AI, security, distributed systems, and full-stack development. Owns local-first architecture and quality systems.

The two previously co-founded IMMURTAL, a music-technology venture that won the Audience Choice Award at the Johns Hopkins FastForward U Spark Showcase in Spring 2023.

## EXECUTION PLAN

|            |                                                                                                   |
|------------|---------------------------------------------------------------------------------------------------|
| 2 months   | Local workspace foundation; official-source capture; Spain Schengen and U.S. B1/B2 workflow maps. |
| 3 months   | 50–100 assisted beta cases with individuals and families; one travel-agency partner.              |
| 4–6 months | Launch the \$29 paid MVP; reach 1,000 paid workspaces at 70% completion and 20% referral.         |
| 12 months  | Expand visa routes and B2B pilots; test pre-trip coordination features.                           |

# VISA MASTER
